

I have recently been made aware that Sinclair Broadcasting is airing an anti Kerry documentary days before the election, our local stations will be forced to air it! our free public airwaves being abused for thier interest!

This is a prime example of why there was such public outcry over the media ownership rules and the dangers of what could come to pass.

Mega corporations are loyal to thier sponsors not our local communities.

Media ownership rules need to be protected and strengthened. The America we hold dear is in grave danger when our airwaves are controled by self interested mega corporations who have no loyalty to community. Our founding fathers banked the durability of our American democracy on a free press so we would have an informed public. Without true freedom of press and the media our democracy is in grave danger of extinction.

Very Concerned
